

I am Senior Consultant for Paediatric Neurology at the Department of Paediatric Neurology, Clinic for Paediatrics I, University Hospital Essen, Germany. Since 2007 my clinical and research activities are focused on long term follow up of patients with GLUT1-deficiency and myasthenic syndroms. In Essen, we established a transition model from pediatric to adult care for patients with GLUT1-deficiency as the unique concept in Germany. Due to my experience with ketogenic diets I organize trainings and workshops in the local area and nationwide. I am also a member of the “ketogenic diet therapies expert-group”, that develops standards and protocols for implementation of ketogenic diets in Germany.
